Xiaomi News & AnnouncementsThe Xiaomi 12S Pro AnTuTu score of 1.1m is much higher than the score reached in Qualcomm Snapdragon 8+ Gen 1 engineering devices. Yiğit Emre YanıkRead in 2 minutes LEICA signed and more powerful model of the Xiaomi 12 series, the Xiaomi 12S Pro AnTuTu score has emerged. The new model, which will be released on July 4, features LEICA optics as well as Snapdragon 8+ Gen 1, which is much more efficient compared to Snapdragon 8 Gen 1. Xiaomi, which could not achieve the desired success in the camera with the Xiaomi 12 Pro, which was released in December 2021, seems to make up for the lack of the camera with the Xiaomi 12S Pro.Xiaomi 12S Pro AnTuTu ScoreAccording to the AnTuTu performance test published days before the launch of the Xiaomi 12S Pro, the Xiaomi 12S Pro scored 1,113,135, outperforming other Snapdragon 8 Gen 1 and 8+ Gen 1 models. According to the official AnTuTu data, the Xiaomi 12 Pro achieves 986,692 score. The new model is 126,443 points higher than before, but the real highlight is the improved thermal and energy efficiency. The fact that the Snapdragon 8 Gen 1 in the Xiaomi 12 Pro was produced by Samsung brought major optimization issues. The device was overheating and throttling. TSMC’s production of the 8+ Gen 1 significantly increases the energy efficiency and avoids the overheating problem. Xiaomi 12S Pro AnTuTu ScoreXiaomi engineers have also worked hard to improve the cooling performance of the device. The cooling technology of the Xiaomi 12S Pro is much more effective than that of the Xiaomi 12 Pro. AnTuTu May 2022 RankingAccording to the May 2022 AnTuTu V9 rankings, the top 5 devices are powered by Snapdragon 8 Gen 1 and their rankings are very close. The highest-ranked Snapdragon 8 Gen 1 device on the list is the Red Magic 7 with a score of 1,042,141. The third and fourth places on the list belong to Xiaomi with the POCO F4 GT and Xiaomi 12 Pro. Qualcomm Snapdragon 8+ Gen 1 engineering samples reached a maximum of 1,089,105 scores. Xiaomi’s first model with the LEICA signature, the Xiaomi 12S Pro, is only being launched in the Chinese market and therefore does not have a DXOMARK ranking. The new model, which avoids the optimization problems and overheating of the previous models, will be launched on July 4 and is expected to achieve high sales from the first moment. The Xiaomi Mi 10T Lite has the OnePlus Nord in its sights. (Image source: Xiaomi/OnePlus - edited) It appears the Xiaomi Mi 10T Lite could be the OnePlus Nord “killer” that has been basically prophesized ever since OnePlus launched its midrange contender onto the crowded smartphone market. The OnePlus Nord is the leader of the pack according to AnTuTu’s global chart for mid-range smartphones, thanks to its average score of 326,958 points. This is for the 8 GB + 128 GB variant that comes with a Snapdragon 765G processor and currently costs €399/£379 from the official OnePlus webstore. However, the Xiaomi Mi 10T Lite has come and ruined the Nord party, at least for now, thanks to its reported AnTuTu performance benchmark result of 329,032 points (+0.6%). Keeping in mind this is a single test score while the OnePlus Nord has had to record over 1,000 results to achieve its current position in the AnTuTu global mid-range chart, although it still bodes well for the Mi 10T Lite. The Xiaomi smartphone is cheaper than the OnePlus Nord but comes with different configuration options: The 6 GB + 128 GB variant is priced at €329. The image of the Xiaomi Mi 10T

Lite, which was shared on Weibo and Twitter by the noted tech tipster Digital Chat Station, does not reveal the individual section scores for the AnTuTu run (CPU, GPU, memory, UX). However, another image does show it is the 128 GB variant of the Mi 10T Lite, which comes with the more sprightly UFS 2.2 storage whereas the OnePlus Nord has to settle for the UFS 2.1 variant, which doesn’t feature the WriteBooster application. Also, the Xiaomi mid-range competitor sports a Snapdragon 750G, which has already been shown to offer better performance over the SD 765G.
